

Sirs:

I have been an XM listner for several years and because of the quality and the many services they provide I have added 2 more units to my household. Their service of news, traffic, weather, and entertainment is invaluable. I get the same quality service uninterrupted anywhere I go in the USA and this is not something I can get from regular radio.

Please reject NAB's petition 04-160 and allow this very timely and needed service to continue to be available.
